## WHAT IS A FOREX BROKER?

A Forex broker is a financial entity that plays a pivotal role in connecting individual traders to the expansive foreign exchange market. In essence, it serves as an intermediary, allowing retail traders to participate in currency trading without direct access to the interbank market where major financial institutions conduct their transactions. Forex brokers offer online trading platforms through which individuals can buy or sell currency pairs, engaging in speculation on the rise or fall of exchange rates. These platforms come equipped with various tools and features, including charts, technical analysis indicators, and economic calendars, aiding traders in making informed decisions. Additionally, brokers often provide leverage, allowing traders to control larger positions with a fraction of the capital. It is imperative for traders to select a reputable and regulated broker, as regulation ensures the broker operates with transparency and adheres to industry standards, safeguarding the interests of the traders. In summary, a Forex broker serves as a gateway for individual traders to access and participate in the dynamic and complex world of foreign exchange trading.

**Most quality Forex brokers will provide 24-hour customer service, due to the fact the Forex market operates 24-hours.**

## QUANTUM

The Quantum Shift is like having a trading wizard team up with a robotic genius! It's a dynamic fusion of human wisdom and cutting-edge AI. Imagine this: when a sweet opportunity arises in a cocktail of 14 currency pairs, our trading wizardry kicks in, and we set our trusty robot loose until we've conquered our goal for that pair. This software is like a tireless worker bee, fully automated and synchronized with the 1-hour timezones. It's not just any old strategy; it's a retracement strategy, designed to ride the waves of market fluctuations like a pro surfer. Buckle up for the future of trading!

**The recommended minimum for this account is 1000 EUR/USD/GBP**

The minimum deposits are a requirement to ensure that the algorithms can perform at an optimised level. This will also increase your potential profits.
