## SETUP GUIDE

You don't have to tackle forex trading alone. Leave the heavy lifting to us and our robots as we grow your account.

Select one or more of our copier services you'd like to copy. We will connect your account, monitor it and you can watch it grow!

## WHAT IS A FOREX BROKER?

A Forex broker is a financial entity that plays a pivotal role in connecting individual traders to the expansive foreign exchange market. In essence, it serves as an intermediary, allowing retail traders to participate in currency trading without direct access to the interbank market where major financial institutions conduct their transactions. Forex brokers offer online trading platforms through which individuals can buy or sell currency pairs, engaging in speculation on the rise or fall of exchange rates. These platforms come equipped with various tools and features, including charts, technical analysis indicators, and economic calendars, aiding traders in making informed decisions. Additionally, brokers often provide leverage, allowing traders to control larger positions with a fraction of the capital. It is imperative for traders to select a reputable and regulated broker, as regulation ensures the broker operates with transparency and adheres to industry standards, safeguarding the interests of the traders. In summary, a Forex broker serves as a gateway for individual traders to access and participate in the dynamic and complex world of foreign exchange trading.

Most quality Forex brokers will provide 24-hour customer service, due to the fact the Forex market operates 24-hours.

## THE CALCULUS

The Calculus algorithm is the cream of the crop among our three options. It's a sophisticated, no-nonsense software that takes into account the latest news events, strategically choosing when to seize trading opportunities or steer clear of uncertain times. It specializes in handling three specific currency pairs with a low Average True Range (ATR), a feature that might seem unassuming but is actually a secret weapon for minimizing potential losses. In other words, it's the smart choice for risk-averse traders looking to keep their drawdown at bay. Choose The Calculus for trading with precision and peace of mind.

Please complete the direct debit mandate here:  
<https://pay.gocardless.com/AL00150MNFF81V>  
before you continue

A minimum deposit of 1000 is required to ensure that the algorithms can perform at an optimised level. This will also increase your potential profits.

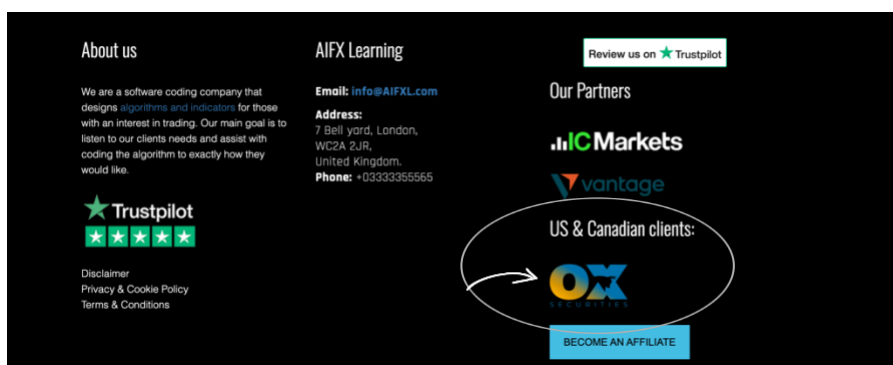

## SIGNING UP WITH OUR PARTNERED BROKER

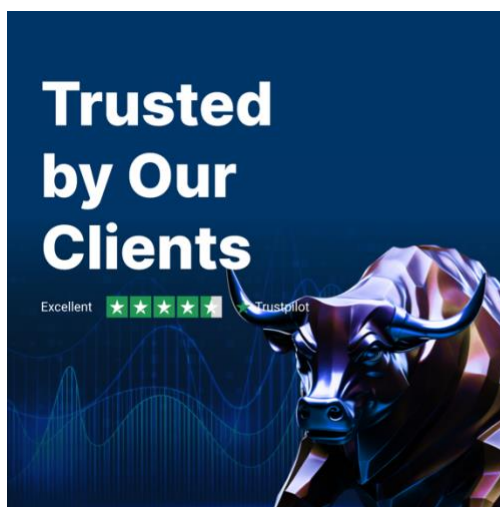

Click the following link

<https://clientportal.oxsecurities.com/auth/sign-up?code=PLMi2DSy21ZX6Dv5B2J2>

or click on the link in the footer to register with our partner brokers.

You will then be taken to the open account page.

After you fill in your personal details, click send verification email. Then navigate to your email and find the verification email.

once you verify the email you will need to login with your email and password you just set.

The screenshot shows the OX Securities client portal interface. On the left, there is a dark blue banner with the text "Trusted by Our Clients" and a Trustpilot rating of "Excellent" with five stars. Below the banner is a stylized bull graphic. The main content area is white and features a "Security info need update" notification. The notification states that the user's password or two-factor authentication has been updated and lists the following information that needs to be updated:

- Authentication apps, e.g. Google authenticator
- SMS for mobile phone (May not working for some regions)

It also lists activities that will be affected by mobile 2FA:

- Login to CRM web portal
- Submit a withdrawal request
- Apply a new FX Live or Rebate account
- Change 2FA settings

The notification mentions that the existing email 2FA will be turned off but can be turned on as an optional additional security feature.

Below the notification is a form titled "Update One Time Password" with a text input field for the "One time password factor" and an "Update" button. A link for "Can not access now? Try other methods: SMS" is also present.

At the bottom of the form, there are two buttons: "Confirm" and "Skip for now". A small risk warning is visible at the very bottom of the page.

You will be brought to the page above; you can setup your 2FA or click skip for now.

Once you are on the dashboard, you will need to complete your KYC as shown below.
